

Bond Analysis

This comprehensive bond analysis provides valuable insights into the top donors, political party recipients, and distribution of electoral bond contributions in India. The data offers a detailed look at the funding sources and patterns that shape the country's political landscape.

Created by karan Gupta

Objective - Empowering Public Scrutiny of Political Finance in India

To empower public scrutiny of political finance in India.

This interactive data visualization platform provides insights into electoral bond usage, including top donors, recipient parties, funding by denomination, and year-on-year comparisons. By shedding light on these financial flows, the project aims to encourage informed citizenry and promote healthy debate about political funding transparency.

Top Donors and Recipients

Top Donors

Future Gaming and Hotels is the top donor, contributing Rs 13.7 billion. Megha Engineering and Infrastructures Ltd is the second-highest donor, contributing Rs 9.7 billion.

Top Recipients

The Bharatiya Janata Party (BJP) is the top recipient of electoral bonds, with Rs 15.9 billion received. The All India Trinamool Congress (AITC) is the second-highest recipient, with Rs 11.9 billion received.

Donation Breakdown

1 Donation Denominations

The majority of donations (62.26%) were made in Rs 1 crore denomination bonds. Donations in Rs 1 lakh denomination bonds account for 11.71% of the total.

2 Largest Contributors

Future Gaming and Hotel Services Pvt Ltd is the largest contributor (47%) by the share of donations made. Western UP Power Transmission Company Ltd comes in second at 11.71%.

Trends Over Time

1

Bond Issuance by Year

The number of electoral bonds issued in denomination of Rs. 1 crore has steadily increased year-on-year since 2019. In 2024 (so far), there have been more Rs. 1 crore bonds issued than in all previous years combined. There seems to be a similar trend for Rs. 1 lakh denomination bonds.

2

Total Bond Value

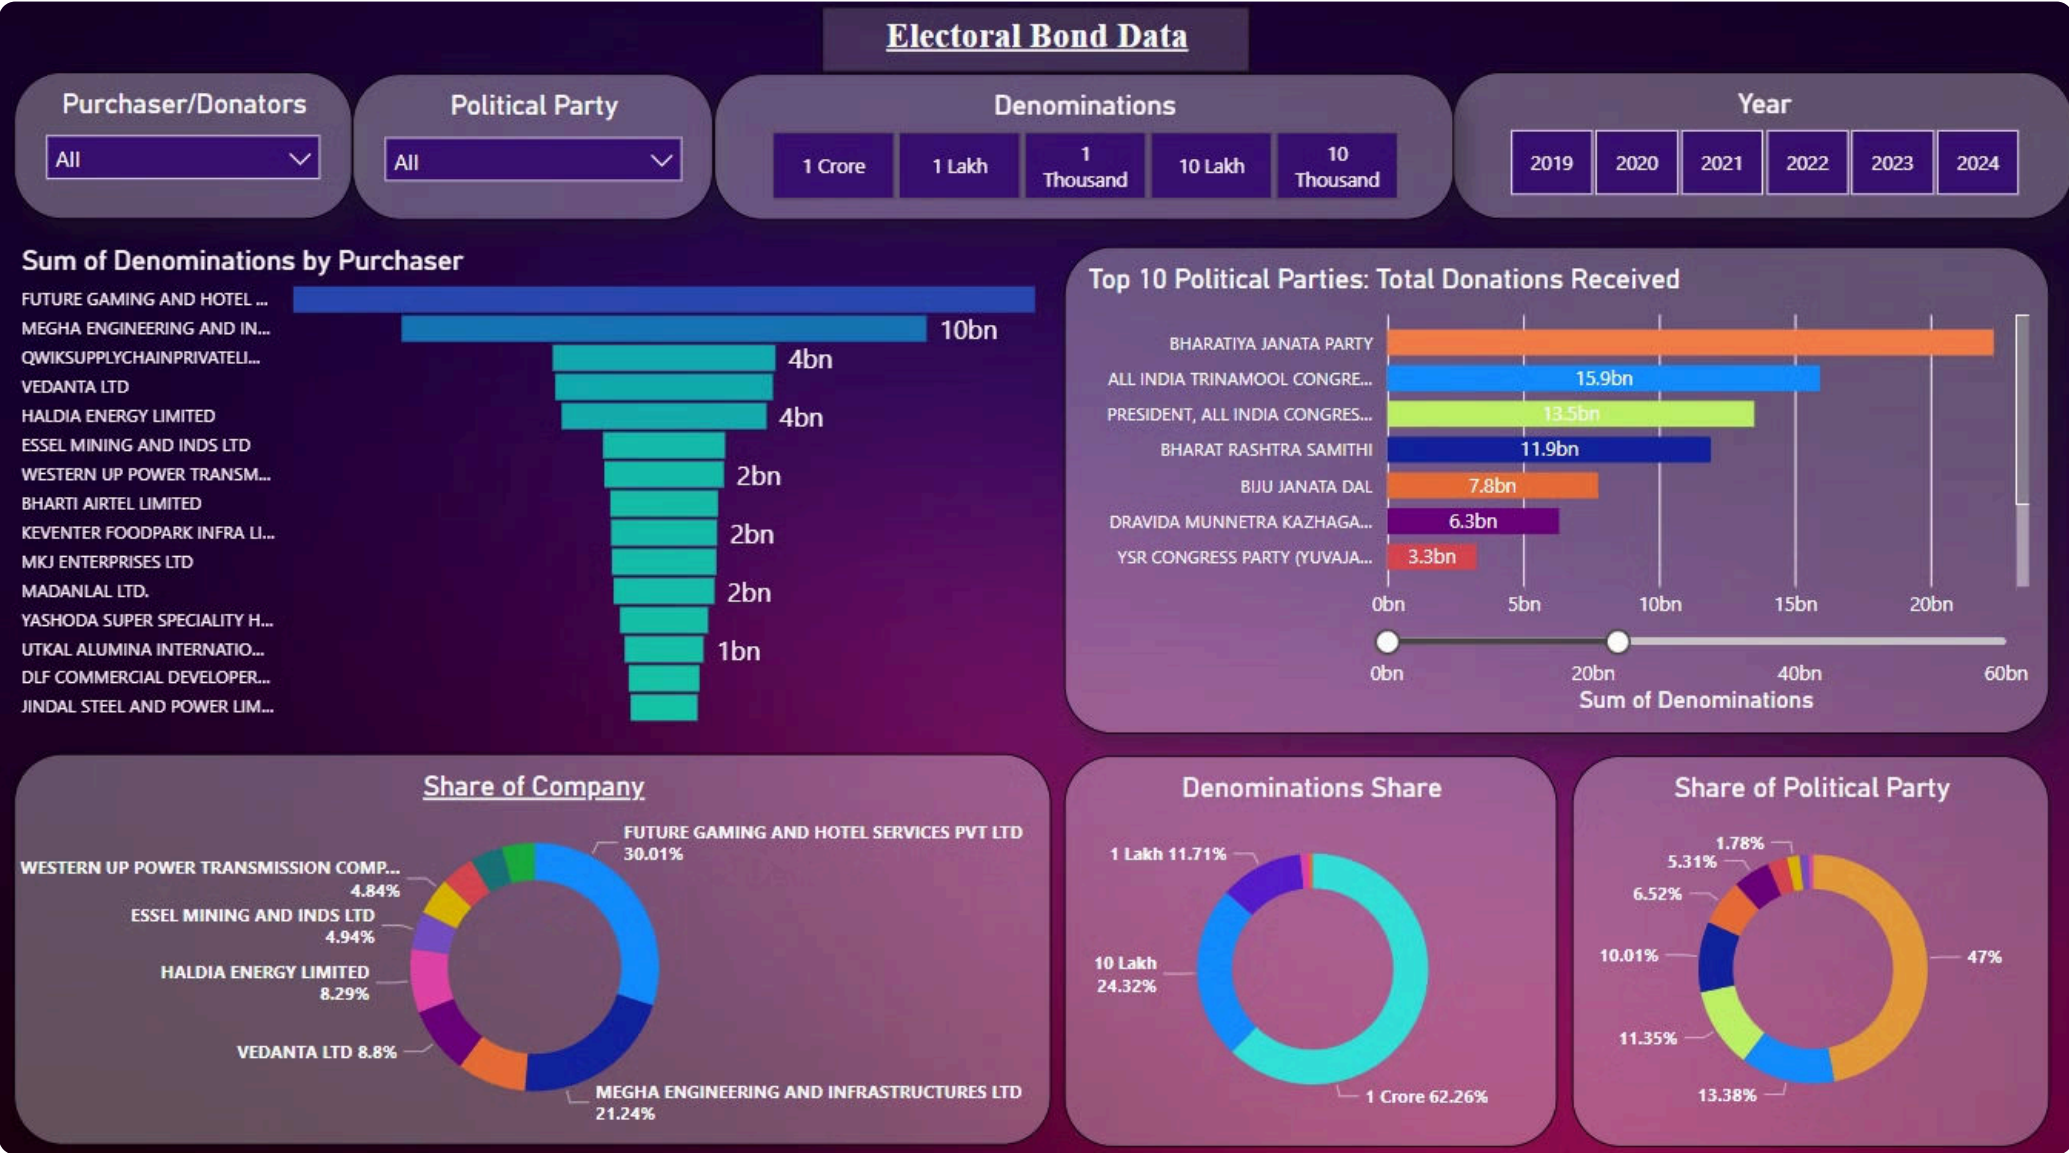

The total value of electoral bonds issued has increased significantly each year since 2019. This is likely due to the increase in the number of Rs. 1 crore bonds issued.

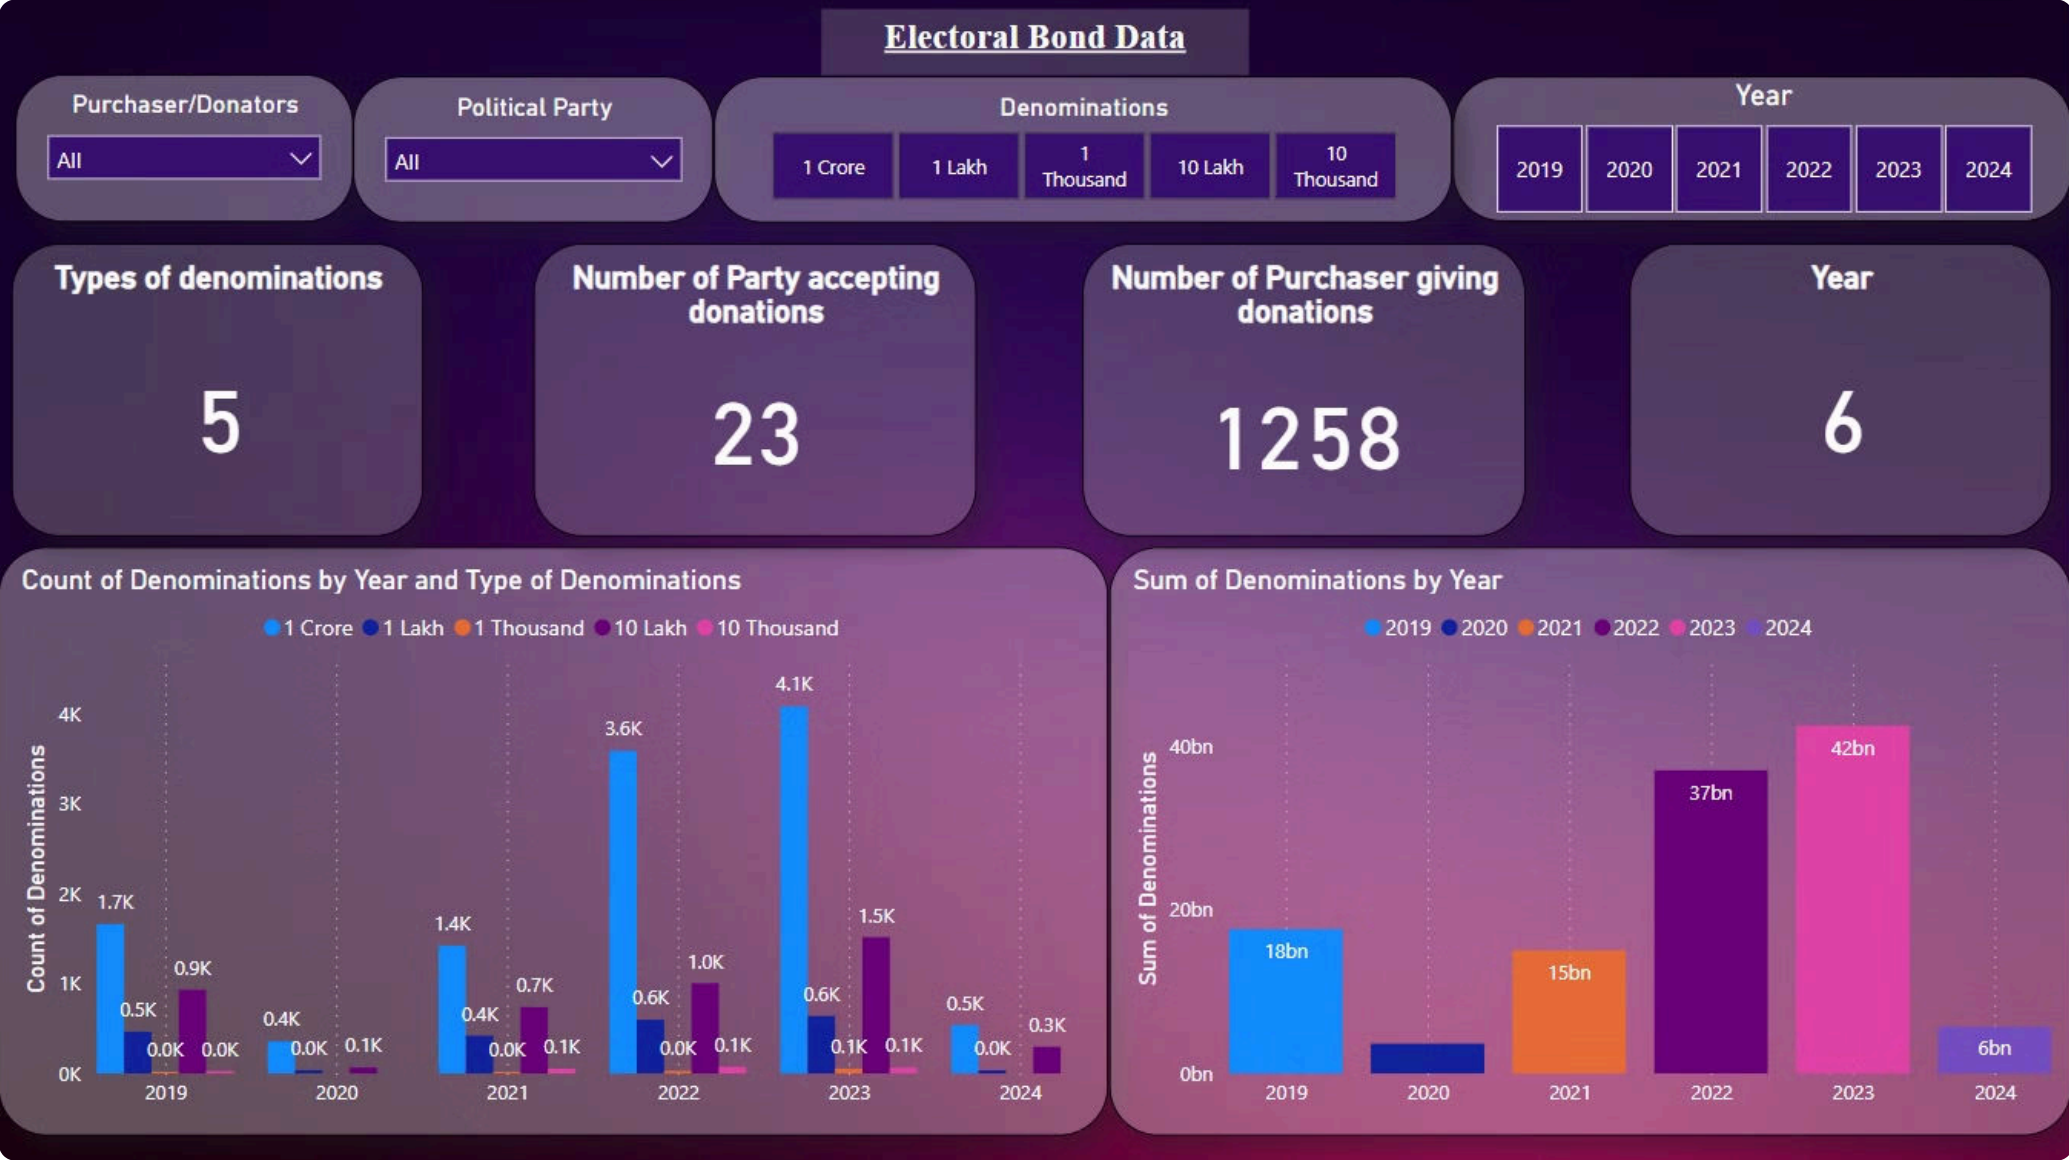

3

Funding Source Decomposition

The data can be viewed as a "Funding Source Decomposition Tree," with the root being "Sum of denominations," then branches splitting by "Purchaser" (companies) and "Political Party" (recipients). These branches could further decompose by "Year" and "Denomination" to show the full breakdown of contributions.
